SCHEDULE IISURCHARGE FORMULA TO BE APPLIED TO A CUSTOMER PRODUCING UNUSUAL WASTE *

The charge for the treatment of unusual waste will be calculated on the basis of the following formula:

$$Ci = VoVi + BoBi + SoSi$$

Ci = Charge to unusual users per year.

Vo = Average unit cost of transport and treatment chargeable to volume, in dollars per gallon.

Vi = Volume of wastewater from unusual users, in gallons per year.

Bo = Average unit cost of treatment, chargeable to Biochemical Oxygen Demand (BOD), in dollars per pound.

Bi = Weight of BOD from unusual users, in pounds per year.

So = Average unit cost of treatment (including sludge treatment) chargeable to total solids, in dollars per pound.

Si = Weight of total solids from unusual users, in pounds per year.

When an unusual user is to be served, a preliminary study of its wastes, and the cost of transport and treatment thereof, will be made. Waste containing materials which, in the judgment of the Union Public Service District, should not be introduced into the sewer system, need not be handled by it. The results of the preliminary study will be used to determine the feasibility of the proposed sewer service and the charge therefore, based upon the formula set out above.

Thereafter, unusual sewage will be monitored on a regular basis, and at the conclusion of each fiscal year, based on the aforesaid and audit of Union Public Service District's records, new cost figures will be calculated for use in the above formula. The cost of establishing the monitoring facilities shall be paid by the unusual user. Based on these audited figures, additional billings covering the past fiscal year will be made for payment by each unusual user, or refund given by Union Public Service District, as the case may be. Such audited figures will then be used for the preliminary billing for the next fiscal year, at the end of which an adjustment will be made as aforesaid.

* 5.18% CASH WORKING CAPITAL RESERVE INCREMENT

$$S = A \times R \times 0.0006233 \times C$$

S = The surcharge in dollars.

A = The area under roof and/or the area of any other water collecting surface connected to the sanitary sewer, in square feet.

R = The measured monthly rainfall, in inches.

C = The District's rate per thousand gallons of metered water usage.

The Union Public Service District shall not impose the surcharge unless and until the customer has been notified by certified mail, return receipt requested, or by hand delivery, that it has been established by smoke testing, dye testing or on-site inspection that rain or surface water is being introduced into the District's sanitary sewer system at the customer's location, and that the customer has not acted within thirty (30) days from receipt of such notice to divert the water from the sanitary sewer system.

Said surcharge shall be calculated and imposed for each month that said condition continues to exist.
